

WARNING: PLEASE CAREFULLY READ THE PRECAUTIONS BOOKLET INCLUDED WITH THIS PRODUCT BEFORE USING YOUR NINTENDO® HARDWARE SYSTEM, GAME PAK OR ACCESSORY. THIS BOOKLET CONTAINS IMPORTANT SAFETY INFORMATION.

IMPORTANT SAFETY INFORMATION - READ THE FOLLOWING WARNINGS BEFORE YOU OR YOUR CHILD PLAY VIDEO GAMES

Some people (about 1 in 4000) may have seizures or black outs triggered by light flashes, such as while watching TV or playing video games, even if they have never had a seizure before.

Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult a doctor before playing a video game.

Parents should watch when their children play video games. Stop playing and consult a doctor if you or your child have any of the following symptoms:

Convulsions Eye or muscle twitching Loss of awareness Altered vision Involuntary movements Disorientation

To reduce the likelihood of a seizure when playing video games:

- 1. Sit or stand as far from the screen as possible.
- 2. Play video games on the smallest available television screen.
- 3. Do not play if you are tired or need sleep.
- 4. Play in a well-lit room.
- 5. Take a 10 to 15 minute break every hour.

WARNING - Repetitive Motion Injuries

Playing video games can make your muscles, joints or skin hurt after a few hours. Follow these instructions to avoid problems such as Tendonitis, Carpal Tunnel Syndrome or skin irritation:

- Take a 10 to 15 minute break every hour, even if you don't think you need it.
- If your hands, wrists or arms become tired or sore while playing, stop and rest them for several hours before playing again.
- If you continue to have sore hands, wrists or arms during or after play, stop playing and see a doctor.

WARNING - Battery Leakage

Leakage of battery acid can cause personal injury as well as damage to your Game Boy. If battery leakage occurs, thoroughly wash the affected skin and clothes. Keep battery acid away from your eyes and mouth. Leaking batteries may make popping sounds.

To avoid battery leakage:

- Do not mix used and new batteries (replace all batteries at the same time).
- Do not mix alkaline and carbon zinc batteries.
- Do not mix different brands of batteries.
- Do not use nickel cadmium batteries.
- Do not leave used batteries in the Game Boy. When the batteries are losing their charge, the power light may become dim, the game sounds may become weak, or the display screen may be blank. When this happens, promptly replace all used batteries with new batteries.
- Do not leave batteries in the Game Boy or accessory for long periods of non-use.
- Do not leave the power switch on after the batteries have lost their charge. When you finish using the Game Boy, always slide the power switch OFF.
- Do not recharge the batteries.
- Do not put the batteries in backwards. Make sure that the positive (+) and negative (-) ends are facing in the
 correct directions. Insert the negative end first. When removing batteries, remove the positive end first.
- Do not dispose of batteries in a fire.

It all began with a single meteorite impact.

Ramiles, the fifth planet in the peaceful and prosperous Gradius system, suddenly lapsed into silence. Moreover, communications ceased from all spacecraft navigating the region. The federal government of Gradius viewed the situation gravely and immediately commenced an investigation to shed light on the mystery.

Soon after, the startling truth was revealed.

Centuries before, Gradius had destroyed the fortress planet of its enemy, the Bacterions, in a final, decisive battle. As a result, countless planetary fragments imbedded with the self-breeding DNA program of an enemy biological weapon were scattered into space. One of those fragments entered into a wide-range orbit and, after 400 years, returned to the Gradius system as a meteorite. After impacting on Ramiles, the DNA program in the meteorite immediately activated itself. The planet was subdued in mere moments.

With their planet in flames, the people of Ramiles – powerless to counterattack – were crushed with despair. Then one day, an old man, looked up to the sky. Reflected in his eyes was the white vapor trail of a combat ship in flight traced against a crimson-dyed sky. The old man was convinced that the ship was the Vic Viper, a super-spatial temporal fighter he had heard of in legend as a child. Seeing this, a faint hope glowed within the old man's heart.

Now, as the people's distant memories return from the ashes, a new battle is about to begin...
